

Snowman Directions By JMS

1. The way you draw my snowman is go to shapes and get a circle and make it about two inches in diameter and then turn it orange. Put it in the bottom of the screen.
2. Get another circle and make it about one and a half inches and put it on the top of the 1st circle and make it orange as well as the 1st one.
3. Put a black vest on the sides of the arms. Then put 3 black dots that are about a centimeter in diameter in the middle of the vest but not on it.
4. Get the dark brown and put it on the size of 15 and make hands and arms. Draw the arms sticking up but out like they are pointing to the corner of the screen. Give him 3 fingers on each hand.
5. Then get another circle for the head and make it orange. Get the black and make it at size 15 and make his mouth 5 dots in a smile shape.
6. Then get the drawing thing and turn it blue and make it small. Then give the snowman eyes. Make it to the size of 20 and turn it black. Draw the snowman a hat that looks like a square with a line over it.
7. Go to the stamps and get a snowflake. Scatter some blue than change the color to red and scatter them. You made the snowman.
